INTERCONNECT OVERVIEW

Metric	Value	Note
Total Revenue	XAF 341,124,776	All traffic types
IDD Revenue	XAF 22,787,992	International Direct Dial
Estimated Interconnect	XAF 27,289,982	~8% of total traffic
Grey Route Indicators	0	Suspected bypass calls
Estimated Revenue Leak	XAF 4,093,497	From grey routes
Interconnect Tax Gap	XAF 1,064,309	TVA+TIC on leaked revenue

GREY ROUTE ANALYSIS

Grey routes occur when international voice traffic is routed through local SIM cards to avoid interconnect fees, depriving the government of interconnect settlement revenue and associated taxes. NOCTYRA360™ detected 0 suspected grey route patterns representing an estimated XAF 4,093,497 in monthly revenue loss.

RECOMMENDED ACTIONS

1. Request interconnect settlement statements from all operators for cross-validation.
2. Compare NOCTYRA360™ IDD counts against international carrier billing records.
3. Issue formal data request to ARTEC for interconnect audit.
4. Consider real-time interconnect monitoring via NOCTYRA360™ live feed.
